---

---

---

---

---

---

## Drug Arrests

Alaska

	2010	2011	2012
Alcohol	363	392	284
Marijuana	1040	1211	817
Methamphetamine	185	194	182
Cocaine	145	108	74
Heroin	82	118	146

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Prescription Drugs Seized

Alaska

	2010	2011	2012
Hydrocodone	627	1051	141
Oxycodone	5,958	1,836	609
All other prescriptions	2,668	2,548	2,839

In dosage units

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Alaska's Statistics

Trust for America's Health, October 7, 2013

Alaska has the 29th highest drug overdose mortality rate in the United States, with 11.6 per 100,000 people suffering drug overdose fatalities, according to a new report, *Prescription Drug Abuse: Strategies to Stop the Epidemic*.

Alaska has the highest Illicit Drug Use Rate in the Nation, according to a new Report based on SAMHSA's National Survey on Drug Use and Health (NSDUH).

This presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Standard Drug Testing Panels

Amphetamine/Methamphetamine	Cocaine
Barbiturates	Benzodiazepines
Methadone	Methaqualone
Opiates (Codeine/Morphine)	Propoxyphene
Phencyclidine (PCP)	Cannabinoids (THC)
Heroin	Alcohol
Oxycodone	

This presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Extended Panels

Tramadol	Fentanyl
Meperidine	Carisoprodol/Meprobamate
ETG/ETS	Nicotine
Buprenorphine	Synthetic Cannabinoids
Bath Salts	

This presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

### Designer Drugs

Designer Drugs are Legal Synthetic Alternatives to Illicit Drugs

Taken to:

- Avoid detection of drug use in routine drug tests
- Experiment with a new drug

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

### Designer Drugs

Potential Dangers:

- Potency & dose are unknown
- Acute & chronic toxicity are unknown
- Presence of toxic contaminants are unknown

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

### Designer Drugs

European Monitoring Center for Drugs & Drug Addiction (EMCDDA) identified more than 200 new designer drugs

Coming our way!

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Designer Drugs

---

**US Legislation:**

- Dec 8, 2011: Synthetic Drug Control Act 2011
- July 9, 2012: Synthetic Drug Abuse Prevention Act
- July 2012: CP 47,497, CP 47,497-C8, JWH-018, JWH-019, JWH-073, JWH-081, RCS-4, JWH-122, JWH-200, JWH-203, RCS-8, JWH-250, JWH-398, AM2201
- May 2013: AKB-48, STS-135, XLR-11
- Feb 2014: ADB-PINACA, AB-FUBINACA, PB-22, 5F-PB-22

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

## Synthetic Cannabinoids

---

Commonly known as SPICE

JWH-018

Delta-9-THC

Bind to Cannabinoid Receptors triggering similar Euphoric Symptoms as THC

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

---

---

---

## Synthetic Cannabinoids

---

**DEFINITION**

THC binds to CB-1 and CB2 receptors in the brain

Synthetic Cannabinoids are any compounds that bind to the CB-1 receptor

Many synthetic cannabinoids bind with up to 100 times greater affinity to these receptors

The presentation is not to be copied or distributed without the specific permission of PAML, LLC.

---

---

---

---

---

## Synthetic Cannabinoids

---

Challenges

- Large amount of analytes
- Constant change of what is in the market
- Lack of information about human urinary metabolites
- Higher potency producing lower metabolite concentrations
- Common metabolites for different analytes

The presentation is not to be copied or distributed without the specific permission of PAML LLC.

---

---

---

---

---

---

---

---

### Synthetic Cannabinoids

Efficacy is the maximum biological effect a drug can have based on its receptor binding.

Potency is a measure of the amount of drug needed to achieve a predefined biological effect.

---

---

---

---

---

---

---

---

## Synthetic Cannabinoids

Compound	CB <sub>1</sub> Ki	CB <sub>2</sub> Ki/CB <sub>1</sub> Ki	Compound	CB <sub>1</sub> Ki	CB <sub>2</sub> Ki/CB <sub>1</sub> Ki
JWH-18	9.0	0.32	XLR-11	24	0.09
JWH-019	9.8	0.57	UR-144	29	0.01
JWH-250	11	3.00	THC	41	0.88
JWH-210	.061	1.5	JWH-208	179	3.18
AM-411	6.9	7.50	JWH-313	422	0.86
JWH-073	8.9	4.27	JWH-201	1064	0.42
JWH-302	17	5.24	JWH-207	1598	2.33

CB<sub>1</sub>Ki – the lower the number the more tightly it binds to receptor  
 Ratio – A high ratio indicates preference for the CB<sub>1</sub> receptor

---

---

---

---

---

---

---

---

## How It Works

Imagine the space between the nerve cells as a kitchen sink and the water as dopamine. In the brain's natural state, the faucet, or nerve cell endings, are always leaking some dopamine, and the drain is always slightly open, vacuuming some of the chemical back into the cell. Methamphetamine turns the faucet on high. Cocaine closes the drain. Bath salts do both at the same time.

**NORMAL BRAIN**

**COCAINE**

**METH**

**BATH SALTS**

Releases a surge of dopamine, then blocks reuptake

**Liquefied Heroin Discovered in Fruit Juice Boxes in Florida**  
**MIAMI** — Nearly 100 fruit juice boxes containing liquid heroin were intercepted Wednesday in a shipment from Colombia, federal officials said.

The 6-ounce boxes, labeled "Hi! Fruit Drink," contained a total of 38 kilograms, or about 84 pounds, of heroin worth \$1.7 million. Customs agents said the juice was initially bought from a grocery store in Colombia, then emptied and refilled with heroin. The shipment was relabeled and five pallets of boxes were shipped alongside pallets of legitimate juice boxes, the agents said.

### Opiates

#### Factors influence drug metabolism:

**Smoking** – Cigarette smokers metabolize some drugs more rapidly than nonsmokers because of enzyme induction.

**Pesticides** – Industrial workers exposed to some pesticides metabolize certain drugs more rapidly than unexposed individuals

**Diet** – charcoal broiled foods and cruciferous vegetables are known to induce CYP1A enzymes, whereas grapefruit juice is known to inhibit the CYP3A metabolism of co-administered drug substrates.

**Age** – influences absorption, distribution, and elimination.

**Sex** – Clinical reports suggest that similar sex-dependent differences in drug metabolism exist for ethanol, propranolol, some benzodiazepines, estrogens, and salicylates.

**Drug-Drug Interactions** – Depending on the residual drug levels at the active site, they also may competitively inhibit metabolism of a simultaneously administered drug.
